CONTENT STANDARD	Geographers use published maps, sketch (mental) maps, and other geographic representations, tools, and technologies to acquire, organize, process, and report information from a spatial perspective.	Geographers use published maps, sketch (mental) maps, and other geographic representations, tools, and technologies to acquire, organize, process, and report information from a spatial perspective.	Geographers use published maps, sketch (mental) maps, and other geographic representations, tools, and technologies to acquire, organize, process, and report information from a spatial perspective.	Geographers use published maps, sketch (mental) maps, and other geographic representations, tools, and technologies to acquire, organize, process, and report information from a spatial perspective.	Geographers use published maps, sketch (mental) maps, and other geographic representations, tools, and technologies to acquire, organize, process, and report information from a spatial perspective.
CONTENT OBJECTIVE: Measurable Outcome:	SWBAT demonstrate comprehension of continents and oceans (map/globe) using a projection map. (Robinson projection) Daily geography sheet highlighting continents/oceans 70% accuracy	SWBAT demonstrate comprehension of how to use a map grid to located places on map using fill in the blank questions. Daily geography sheet world map 70% accuracy	SWBAT demonstrate comprehension of locations of continents and oceans on map by labeling a map Map should have all continents and oceans labeled	SWBAT demonstrate comprehension of how to use latitude and longitude coordinates to find absolute location using map of the world Questions answered with 100% accuracy	SWBAT demonstrate knowledge of how the lines of latitude and longitude measure using map of world Questions answered with 100% accuracy
LANGUAGE OBJECTIVE:	SWBAT orally explain the location of continents/oceans using sentence stems _____ is located in the _____ hemisphere.	SWBAT orally explain how to use a latitude and longitude to locate places using a projection map of the world	SWBAT orally explain the locations of continents and oceans on their map during presentation to class.	SWBAT orally give the coordinates of places using latitude and longitude using map of the world	SWBAT orally explain how longitude and latitude lines run and measure using sentence stems. Longitude lines run _____ and measure _____. Latitude lines run _____ and measure _____.
Vocabulary:	Latitude Longitude Cartographer Projection map hemisphere				Continents/oceans quiz
